Projects

Movie Theater Analytics | Team Project (3 members)

October 2025

- Conducted in-depth analysis of box office performance to recommend ways for American cinema chains maximize profits by identifying key revenue drivers, including genre, lead actors, and directors
- Cleaned and structured raw movie data in Google Sheets to ensure accuracy and consistency for analysis
- Created data visualizations in Tableau to visualize trends, portray performance patterns, and provide actionable insights to optimize film selection strategies

Marketing Analytics Capstone | Team Project (4 Members)

November 2025

- Delivered end-to-end campaign performance reporting for a global telecommunications client, consolidating data to provide actionable insights that improved marketing efficiency
- Created and optimized pivot tables with calculated fields in Google Sheets to aggregate audience data across platforms, segmenting users by demographics and interests
- Designed Tableau data visualizations to visualize key audience KPIs by integrating data from a dataset which improved stakeholder visibility into performance trends

Work Experience

The Coder School

Queens, NY

CUNY Career Launch Summer Internship: Coding Tutor

July 2022 - August 2022

- Mentored 12 or more students daily in building two-dimensional games using Scratch, contributing to a 20% increase in class retention over the course of the program
- Taught Python programming concepts including turtle graphics to novice programmers, improving student confidence scores
- Led small group learning sessions of 3-4 students, resulting in improved collaborative coding skills and peer-to-peer knowledge sharing
